Today, I'm going to discuss a crucial component of my HiFi system that has made a significant audible difference: the KECES IQRP-1500. Surprisingly, it's also the most affordable component in my setup. I'll explain what it does and why it might be a worthwhile investment.

You've likely noticed this mysterious device in many, if not all, of my videos over the past year and a half. The KECES IQRP-1500 is an Isolated Quantum Resonance Power Conditioner that powers all the equipment on my audio rack, including my power amplifier. KECES offers three power conditioners, and this one is the mid-range model. It's priced at \$2300 in the US and €2400 locally. Let's explore how and why it has made such a noticeable impact on my audio experience.

ROTEL tries to repack the Digital Realm. The new MICHl Q5 "TRANSPORT DAC" is here to prove that.
